

This is a particular themed centrepiece to a playground, in this case a lighthouse, which offers unlimited play potential for children on two levels. The lighthouse includes an internal paddle stair to the upper level, where children will find a sliding pole, slide, climbing wall, climbing net and large ladder. The lighthouse can be modified and extended.

This lighthouse was designed and modelled on the River Usk lighthouse for the RSPB at their new wetlands reserve in Newport, Wales - the playground has many more very unusual items of theme play equipment. This, for children, must be the most fun lighthouse in the world! Yet it is topical, unique and appropriate to its environs.

The lighthouse with platform allows for many play features

The lighthouse is a durable, robust and unique construction

Product specification

Price from £22,000.00

Dimensions:

Length	7000mm (22'11")
